Department of Mathematical Sciences

Condolence Message

The faculty, staff and students of the Department of Mathematical Sciences express their heartfelt condolences at the tragic and untimely death of Basit Rather a 6th semester student of the Department. These sentiments were expressed during a condolence meeting held in the Department which was attended by faculty, staff and students.

Basit, who always had a big smile on his face, had finished his final semester only a couple of weeks ago. He was a brilliant student and had secured the highest marks in the senior project that he had recently submitted. He was also the opening batsman for the Departmental team and had been an inspiration for his teammates.

Basit suffered a brain hemorrhage last week and passed away on Sunday, November 25. His loss is a shock for the whole Department and everyone who knew him. May he find the best place in heaven and may God give his family the strength to bear this tragic loss.

Faculty, staff and students
